

CAREER PATHFINDERS

BACHELOR OF ARTS DEGREE WITH A MAJOR IN

ECONOMICS

Overview

Economics analyzes how societies provide for their well-being, and examines the choices and trade-offs that are made in the face of limited resources. It studies the competition and cooperation that arises among individuals, private organizations, and governments in the process of allocating scarce resources to a variety of different uses in society.

Economics is widely recognized as a solid background for many jobs and professions in business, financial services, government and law. Graduate level studies can lead to university teaching positions, independent consultancies, and research.

"The Economics program was instrumental in helping me prepare for my graduate work and career. I utilize the knowledge and analytical skills that I acquired through the program on a daily basis."

- Gavin Kaisaris, BA (Honours), Economics, who went on to complete an MA at Carleton University, and now works as a Policy Analyst at the Canadian Federation of Independent Business.
