

Socrates says: Apply to a Philosophy MA program at the University of Alberta

We focus on our 1-year course-based MA program **with a research component**,* consisting in a directed reading with one's research project supervisor followed by writing a capstone paper that can serve as writing sample for PhD applications. (The program can also be completed in a longer time-frame.)

*permits applying for a SSHRC CGS-Master's fellowship ([Dec 1 deadline](#))

Nearly all students in our program receive **departmental funding**.

While we admit students to our traditional thesis-based program in exceptional circumstances only, applicants need to apply only once and will also be considered for our course-based program.
